

## State-Of-the-Art Mars Hill Medical Center

Patients of the Mars Hill Medical Center deserve a top-notch facility. Of Hot Springs Health Program's four medical centers, the Mars Hill facility accepts patients the most hours, until 7:00 p.m. seven nights a week. In 2012, the Mars Hill Center had nearly **19,000 patient visits and filled 26,000 prescriptions**. Imagine 35 employees currently sharing 6,600 square feet with patients and other visitors!

### Key Benefits

- The new facility will house up to 8 physicians (currently 4) and up to 60 (currently 35) professional and support staff, to enable HSHP to meet the demands of a growing community.
- Encompassing 16,700 square feet, the attractive design is all on one level, more than doubling the current floor space.
- The number of exam rooms will increase from 10 to 24.
- The new pharmacy will have convenient, independent accessibility.
- Families with children will have their own child-focused waiting room.
- The plans save money in two ways: 1) the Center will be built on the current site where the parking lot is now, so no new land had to be purchased; and, 2) the existing facility will continue to operate for as long as possible during construction, only minimally interrupting patient care in Mars Hill and averting the need for a costly, temporary location.

### Naming Opportunities: Leave Your Legacy

Funding for the new Mars Hill Medical Center is urgently needed and will require many gifts, large and small, current and deferred. Unless they request anonymity, every donor who contributes \$1,000 or more during the campaign will be publicly acknowledged in the new facility. Additionally, there are opportunities available to contributors who would like to have spaces named, if not for themselves, in honor or in memory of a loved one.
